ABOUT ME

Software developer with 6 years of experience in web development. After initially starting my career as a backend developer, where I gained expertise in C#, ASP.NET, and MS SQL Server, I later transitioned to frontend development, focusing on ReactJS, TypeScript, and NextJS to create dynamic and responsive web applications.

Currently, I support both frontend and backend applications in my role, leveraging my full-stack expertise to deliver comprehensive solutions. My experience spans developing user-friendly interfaces, implementing robust backend architectures, and ensuring seamless integration between the two.

WORK EXPERIENCE

Full-stack Developer

Modaramo Media [Nov 2022 – Current]

City: New York | **Country:** United States

- Work with technologies such as React, TypeScript, React Native, C#.NET, and MSSQL to deliver high-quality software solutions
- Contribute to the development of a social media application as part of the frontend team and participate in mobile development processes using React Native.
- Independently develop a fully functional advertising placement application for the company, focusing on frontend development.
- Support various internal projects, offering both frontend and backend solutions.
- Take full responsibility for the backend development of the "Chatbot" project, utilizing C#.NET and MSSQL to create scalable and robust architectures.

Full-stack Developer

Bilge Adam Technologies [Sep 2021 – Nov 2022]

City: Istanbul | **Country:** Türkiye

- Contributed to the development and maintenance of a web application used by a large customer base.
- Designed and implemented new modules and algorithms to address complex business logic.
- Worked on a full-stack web application built with ASP.NET Core and React JS, collaborating with an agile team of 7 members.
- Led and managed a team of 2 junior engineers to develop an admin panel for managing on-premise applications, employing Agile methodologies.
- Conducted research on Microservice Architecture to transition monolithic projects and prepare for future company initiatives.

Back-end & CRM Developer

Ericsson [Jan 2021 – Sep 2021]

City: Istanbul | **Country:** Türkiye

- Developed features for a Dynamics 365 application supporting CRM processes for telecommunications products.
- Designed and implemented REST APIs using .NET, ensuring seamless integration with the Dynamics 365 platform.

Back-end Developer

Caretta [Aug 2018 – Dec 2020]

City: Istanbul | **Country:** Türkiye

- Participated in the development and maintenance of 5 web applications built using ASP.NET, working within an agile team comprising a project manager and 5 software developers.
- Created and optimized stored procedures in Microsoft SQL Server to manage and implement business logic efficiently.
- Maintained ETL processes for web applications, executed via a Windows Service, ensuring smooth data integration and processing.
- Contributed to the entire software development life cycle of a web application designed for a client, including attending customer meetings to gather and document project requirements.

CRM Developer

L'Oréal [Dec 2018 – Sep 2019]

City: Istanbul | **Country:** Türkiye

- Supported for development and maintenance processes of L'Oréal Turkey's internal projects built on Dynamics CRM.
- Developed C# plugins for projects.
- Made system designing, form customizations, solution management, custom page integrations and workflow development on Dynamics CRM.

Assistant Software Engineer

Caretta [Feb 2018 – Dec 2018]

City: Istanbul | **Country:** Türkiye

- Worked alongside by a developer to develop some modules on a web application build on ASP.NET.
- Some modules are developed for an in-house web application from scratch and these modules were used by employees.

DIGITAL SKILLS

Front-end Development

Typescript / Javascript / HTML / CSS / Styled Components / React / Next.js / SCSS / Ant Design / Bootstrap / Emotion / jQuery / Redux / Chart.js / Recharts / Motion / i18n

Back-end Development

C# / T-SQL / .NET / .NET Core / .NET Framework / Dapper / Linq Entities / SQL / Microsoft SqlServer / Redis / Entity Framework, Entity Framework Core / ASPNET SignalR / Swagger / RabbitMQ / MediatR / Serilog / OpenIddict / RestSharp / RESTful APIS / AutoMapper / Atlassian (Bitbucket, Confluence, Jira)

Applications & Tools

Github / Photoshop / Figma / Slack / Teams / Microsoft Dynamics 365 CRM / Visual Studio / Azure Devops / Visual Studio Code / Postman / Docker

EDUCATION AND TRAINING

Bachelor's Degree in Mathemtaical Engineering
Yildiz Technical University [Sep 2013 – Feb 2018]

City: Istanbul | **Country:** Türkiye | **Website:** https://www.yildiz.edu.tr/

Computer Engineering Erasmus Programme
Technological University of the Shannon [Sep 2016 – Dec 2016]

City: Westmeath | **Country:** Ireland | **Website:** https://tus.ie/campuses/athlone/

LANGUAGE SKILLS

Mother tongue(s): Turkish

Other language(s):

English
LISTENING B2 **READING** B2 **WRITING** B2
SPOKEN PRODUCTION B2 **SPOKEN INTERACTION** B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

Leedobot Chatbot Application
Developed a chatbot application enabling users to interact via a widget, guiding them through predefined flows or leveraging ChatGPT for dynamic conversations. The project focused on creating an intuitive and efficient communication platform tailored to user needs.

Rambly
Developed a blogging platform tailored for influencers to create and share content in the form of blog posts. The application provides a user-friendly interface for influencers to engage with their audience and manage their content efficiently.

AdServe
Developed the front-end for an advertisement management admin panel that enables embedding and tracking advertisements across various platforms. The application provides a comprehensive interface for managing ad campaigns, monitoring performance metrics, and optimizing ad placements.

TheLegalFront
Developed the front-end for a platform dedicated to connecting individuals with top-tier attorneys specializing in various case types, such as defective product claims, personal injury, or abuse cases. The platform focuses on providing users with an intuitive and seamless experience to find legal assistance tailored to their needs.

Garanti BBVA Career Portal
Developed both the front-end and back-end components for a career portal designed for Garanti BBVA. The platform allows internal employees and external candidates to upload their CVs seamlessly. Additionally, implemented functionality to parse predefined CV formats, ensuring efficient data extraction and standardization.

HR Thema HCM

Contributed to the development of a Human Capital Management (HCM) software tailored for companies' human resources departments. Worked on enhancing specific modules to streamline HR processes and improve user efficiency.

SYS (Sales Management System)

Developed a comprehensive Sales Management System tailored for pharmaceutical companies to manage stock tracking, reconciliations, and order processes efficiently. The system was built on a modular architecture with customizations and error correction packages to meet the unique requirements of clients, including Takeda, Santa Farma, Novartis, Pfizer, and Sanofi. The system supported dynamic workflows, comprehensive reporting, and integration with external systems, enabling seamless operations.

ADVICE

Developed a robust customer complaint management system designed to handle and streamline workflows on the Dynamics CRM platform. The project, consisted of multiple interconnected forms, workflows, and tasks that guided users through various complaint-handling stages, such as data gathering, analysis, and resolution. The platform is tailored to meet the needs of diverse scenarios while ensuring an efficient complaint resolution process.

TCRM (Telecom Customer Relationship Management)

Developed and managed a Telecom CRM system built on Dynamics CRM on-premise, designed to handle customer interactions, order management, and complaint tracking for telecom companies. The platform was tailored to operate efficiently within a robust server architecture and leveraged advanced workflows, web services, and custom solutions for seamless operations.

CAPS (Caretta Application Processing System)

Developed a workflow management system for Caretta, designed to streamline employee task tracking and manage modules such as leave requests and expense claims. The system provided an integrated platform for handling employee workflows, ensuring efficiency in daily operations and administrative processes.

IMPORT

Developed a Dynamics CRM-based application designed to calculate customs costs for packages and shipments. The application streamlines the process of tracking, calculating, and managing customs-related expenses, ensuring accuracy and compliance with international trade regulations.

HOBBIES AND INTERESTS

Chess
- Competed as a FIDE-licensed chess player, demonstrating strategic thinking, problem-solving skills, and a strong competitive mindset.
- Participated in national and international chess tournaments, showcasing discipline and focus under pressure.

Game Development
- Develop 2D and 3D games in my free time using Unity and C#, focusing on creating interactive gameplay and immersive experiences.
- Explore mechanics, design patterns, and optimization techniques to improve performance and user engagement.
- Familiar with the game development lifecycle, including prototyping, debugging, and asset integration.
